Power Supply
Caution:
Power su pply voltage can not be higher than 12V.
DC 9V
** Thes e voltages wer e measured when SW1 is at GN D pos ition.
* These voltages are power volt age dependent . The value s shown were measured at 9.3V powe r voltage.
Notes:
1. Part values used coul d be differen t to the values shown. Ple a se refe r to part list.
2. Parts in dash-line boxe s are SMD devices.
